EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claim 9: A retractor support for retaining a retractor in a retraction position within a surgical wound, the support comprising:

a support member positioned near the surgical wound; and

a flexible loop detachably attached at least at one end to the support member and

engaging a proximal end of the ~~tractor~~ retractor such that the retractor is retained in the retraction position.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the prior art of record fails to disclose or reasonably teach a retractor retaining device for retaining a retractor from a retractor support in a retraction position within a surgical wound, the device comprising a main body attachable to the retractor support, and a flexible loop detachably attached at one end to the main body for engaging a proximal end of the retractor such that the retractor is retained in the retraction position. The closest prior art is considered to be Farascioni (USPN 6,709,389) in which it a surgical retractor retaining device is disclosed having a main body 16 attachable to retractor support 12, and a flexible loop 22. However, flexible loop 22 is not detachably attached at one end to the main body 16. Therefore, Claims 1-36 have been allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
